

# Amana® 16 cu. ft. Amana® Upright Freezer with Revolutionary Insulation

AZF33X16DW

Available Finishes/Colours

	AZF33X16DW White
---	---------------------

Dimensions

Width	30 1/4
-------	--------

Configuration and Overview

Freezer Type	Upright
Advance Foam Insulation	99.9% lower Global Warming Potential and Better Energy Performance

Exterior

Defrost Drain	No
Freezer Handle Type	Pocket Handle
Door Finish	Textured
Handle Material	Plastic
Freezer Door Lock	No
Door Opening	Right
Door Style	Contour

Exterior

Hidden Hinge	Yes
Reversible Door	Yes

Details

Advance Foam Insulation	99.9% lower Global Warming Potential and Better Energy Performance
Freezer Door Lock	No
Door Style	Contour
Power On Indicator Light	No
Ice Maker Compatible	No

Controls

Control Type	Electronic
Defrost Type	Automatic Defrost

This 16 cu. ft. Amana® Upright Freezer comes with Revolutionary Insulation, which helps lower the global warming potential of your freezer by 99.9%¹. You can also chill large amounts of food by using the Fast Freeze option, which can cool down the entire freezer.

Top Features

- Fast Freeze Option
- DeepFreeze® Technology
- Energy-Saving Insulation

AZF33X16D	AZF33X18D
AZM12X17D	AZB33X20D
AZB33X18D	AZF33X20D

**Recommended grounding method**  
A 115 Volt, 60 Hz., AC only, 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your freezer be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

**Water Pressure**  
A cold water supply with water pressure of between 30 and 120 psi (207 to 827 kPa) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, see “Troubleshooting” or call a licensed, qualified plumber.

**Reverse Osmosis Water Supply**  
If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

LOCATION REQUIREMENTS

**IMPORTANT:** Do not install the freezer near an oven, radiator, or other heat source, nor in a location where the temperature will fall below 40°F (5°C).  
Check the strength of the floor before installing your freezer. It should hold the weight of a freezer fully loaded with food.  
Allow at least 3" (7.5 cm) of air space at the top and on both sides of the freezer and 1" (2.5 cm) between the back of the freezer and the wall. If the freezer is to be against a wall, leave extra space on the hinge side so the door can open wider.  
**NOTE:** This freezer may be installed side by side with another refrigerator or freezer. Allow for a 3" (7.5 cm) clearance at the top and sides and a ¼" (0.64 cm) clearance between the appliances.
